

Chapter 1: Project Proposal

1.1 Bigger Problem

Nearly 1 in 4 adults feel lonely, 20 – 40 % of the people are introvert, most of the people spend time using social media. Fewer people can express themselves, Less and less people are taking hardships, and less and less people think about freedom, challenges. Lesser and lesser have clarity of thoughts. Most people have become more emotional, angrier, and more frustrated. People nowadays don't self-analyze themselves.

These problems are making a dire impact on individual leading to an impact on its surrounding, which leads to an impact on society, which leads to impact on whole of humanity. And most importantly it makes an impact to upcoming generations.

We believe that a small step of just keeping your daily records may change your style of living. Writing diary helps people adjust to hardships, freedom and challenges. It helps individual express intense emotions, such as anger and frustrations without harming anyone. It provides the opportunity to self-reflect and self-analyze ourselves. It helps to organize thoughts and feelings. Over a period of writing, there will be a noticeable improvement in the clarity of thoughts. It also helps in enhancing your writing skills.

Writing a diary at the end of the day not only helps to speculate the day but it helps to feel the past with an enjoyable smile and happiness. Sometimes writing a sad day today can make you smile or even laugh in the future. It can make people see their mistakes and implement them.

There is no one solution for the problem, but there is no simple solution also for this. So, it's always best to implement many solutions and let individual dragged by the most appeals ones for individuals. Small solutions may impact less but they surely do. Small impacts make big Impacts in life.

We implement Journal AI, a diary writing app named Chronicles – Write Your Journey, which makes it easy and portable to write your diary digitally.

1.2 Problem Statement

While the broader issue may be what we previously discussed, there are also specific challenges associated with maintaining a physical diary. Writing by hand can feel tedious, and consistently keeping a diary over many years can become disorganized and difficult to manage. Additionally, ensuring privacy with a physical diary is often a concern.

There is a big generation change happening, people are spending more time on digital books than on physical books. Individuals of 20th generations are spending more time on computers than anything else.

This leads to digital books, digital articles, digital newspaper and digital everything.

We create a free cross platform portable software which lets Individual write their daily dairy digitally and we tend to make it fun by adding features like To-Do List, sharing your diary, Text Summarization, our AI reacts to diary and many more.

1.2.1 Our Aim

- Involve more individuals into daily writing habits.
- Helping individual become happier, thoughtful and stress-free.
- Helping more individuals introspect themselves.
- Helping individuals get clarity of thoughts.
- Solving the bigger problem.

1.2.2 Objectives for our Application

- To keep the UI interactions as simple as possible and easy to understand.
- To keep it free to use.
- To ensure cross-platform compatibility (Android, iOS)
- To make it Secure by securely storing the user data within the device. And storing all user data on a secure cloud platform.
- To maintain user's privacy and store user information as per user consent.

1.2.3 Features in our Application

- Easy to use and easy to write Diaries
- To-Do List
- Speech to Text
- Text to Speech
- Shareable Diary – Diaries can be made public
- Manage friends
- Text Summarization
- Reminders, pop-ups, notifications to maintain Streak
- Streak
- Badges
- Digital to pdf, e-pub, book

* Kindly refer to the detailed feature description in **Chapter 3**
